

# Treasure Hunt – Getting Started Guide

## Download

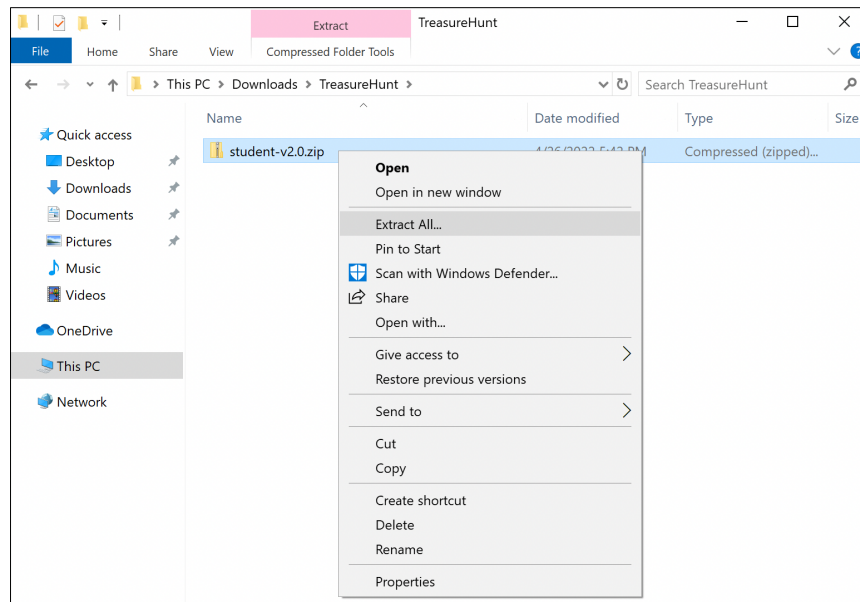

1. Download the **student-v2.0.zip** file from your teacher.
  - a. Save it to a location like the Downloads folder or to your personal drive.

## Extract Files

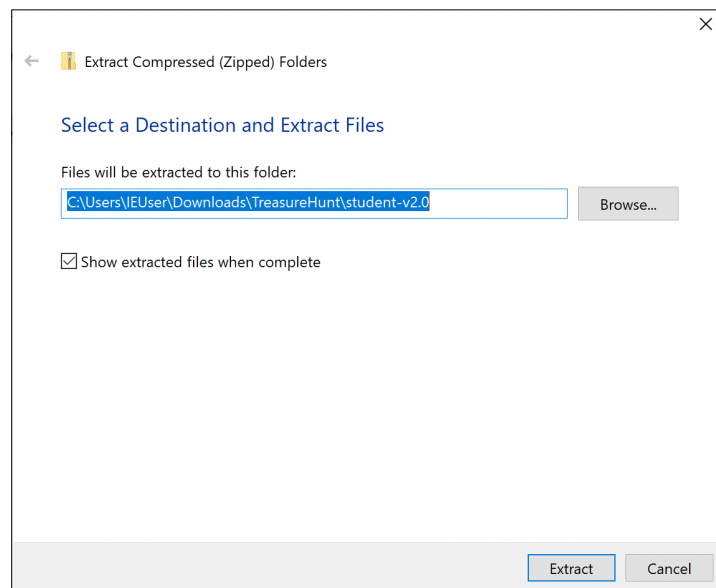

1. Find the **student-v2.0.zip** file in Windows Explorer.

2. Right-click the file, and select 'Extract All...'

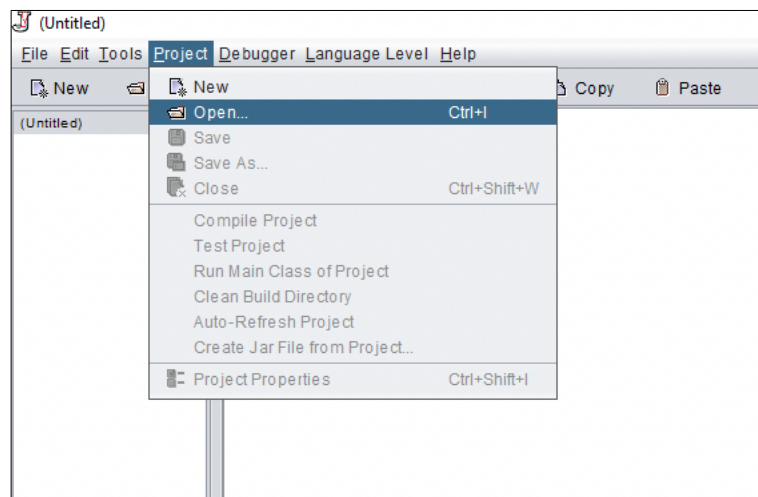

3. A dialog box (shown below) will appear asking where to extract the files.
  - a. Click 'Extract'. **Remember this location!**

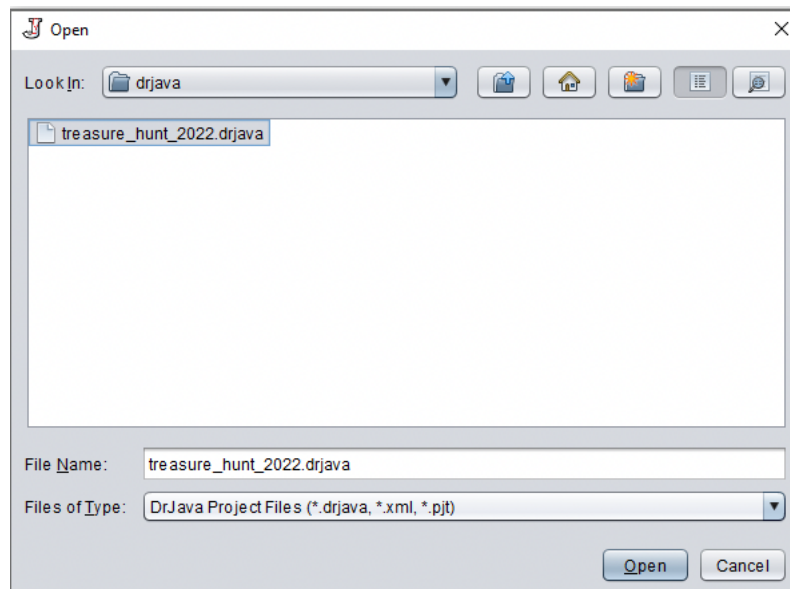

## **DrJava**

1. Open DrJava.
2. Under Project, click 'Open...' to get the following dialog box:

3. Navigate to your remembered location where you extracted the files.

4. Enter the **treasure\_hunt\_2022** folder and then the **drjava** folder.

5. Select the **treasure\_hunt\_2022.drjava** file and click 'Open'.
6. The project should now be in your DrJava workspace with the **MyPlayer** ready for you to code.

### ***Compile and Run***

1. Compile the project by clicking 'Compile Project'.
2. Click 'Run' once your project is compiled to test that the application works.
3. Happy coding!!!!
